Description:

The City of Brunswick has entered into a contract with the Northeast Ohio Area Wide Coordinating Agency (NOACA) to prepare a bicycle master plan. The work is being funded in part by the Northeast Ohio Area Wide Coordinating Agency's (NOACA) Transportation for Livable Communities Initiative (TLCI) grant awarded to the City of Brunswick. The City of Brunswick has seen significant growth over the past years in both the residential and commercial development of the City.

The growth has resulted in more auto-oriented development with the side effect of more motor vehicle traffic resulting in increased congestion levels throughout the City. Providing alternative choices and options will relieve some of the impact of automobiles on the City. Bicycling is a pollution free, economical and healthy method of transportation and recreation. Creating an environment where bicycling can be a viable alternative to the automobile can have a significant and positive impact on the quality of life in the City of Brunswick.
